Response to Amendment

The amendment received 6/20/07 has been entered in full.

Response to Arguments

Applicant's arguments, see pages 1-2, filed 6/20/07, with respect to the claims have been fully considered and are persuasive. The rejection of all pending claims has been withdrawn.

Allowable Subject Matter

Claims 1-30 are allowed.

The following is an examiner's statement of reasons for allowance: As persuasively argued by the Applicant, Alderson fails to teach vector gradient images. None of the prior art of record teaches a gradient domain compression system for generating, from an input image having a high luminance dynamic range an output image having a lower luminance dynamic range comprising a gradient image generator module wherein gradients comprise a vector of at least two-dimensions and a gradient compression module configured to receive the gradient image and generate a compressed range gradient image in which the range of the gradients are compressed. These limitation are reflected in all of the independent claims, thus all of the claims are allowable for the same reasons given above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. LCIS: A Boundary Hierarchy for Detail-Preserving Contrast Reduction.
